

Shoe Covers For Professionals

Made in Canada!

Over the years, BlueMed developed extensive expertise in designing and manufacturing shoe covers for specific needs and requirements of different environments.

Our team designs products for practicality and performance. We manufacture them with higher standards and package them for convenience.

Our shoe covers maintain consistency in material and production process.

Our products are used by many industries concerned with compliance and cross-contamination protection.

Product Design and Quality Assurance

Each product goes through multiple design phases and comprehensive testing to validate its performance in the specify environments it was designed for. Product packaging is then designed for optimal handling, dispensing and shipping.

Our products are manufactured using advanced automation systems and bear the BlueMed quality seal.

Our quality assurance procedures and standards guarantee the client a quality product in every package.

Innovations

Creators of the rectangular shoe covers, dispensing boxes and various solutions for specific environments

Attention to details

Every detail in manufacturing a shoe cover is considered to give the user comfort and good fit

Packaging

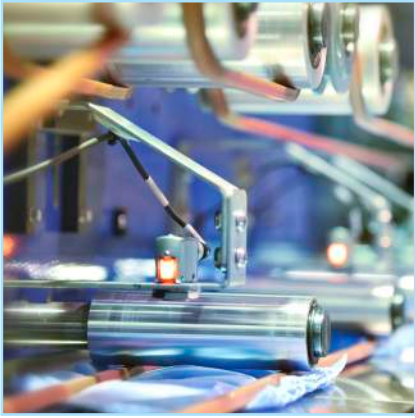

Designed for convenience! Products packaging is made for optimal dispensing, handling and shipping

Focus on safety

Shoe covers designs and fabric selection are carefully done with user safety in mind

Automation

Advanced technologies and automations are implemented for higher production quality and controlled costs

Efficiency

Manufacturing with considerations for energy saving and respect for the environment

Research and development

We make major investments in Research and Development (R&D) throughout the design and production cycles;

Versatility

Expertise in handling a variety of materials to design custom solutions based on customer requirements

FABRICS:

The fabrics we use are manufactured according to our specifications for particular applications and environments.

Fit-Form-Function

Shoe covers designs provide a near perfect fit regardless of shoe or boot size

ENGINEERING THE PRODUCT:

Our products are developed for ease of wear and removal. Our innovative designs allow a near perfect fit for any size of shoe or boot.

MANUFACTURING EQUIPMENT:

Our equipment is either designed in house or custom made to offer higher production quality at a controlled cost. This makes our final product highly competitive.

Shoe Cover Expertise

At BlueMed, our core expertise is in shoe cover manufacturing and we focus on it. We are successfully maintaining the delicate balance between Product Engineering, Production Efficiency and Cost Control.

We help our clients, in a variety of industries, solve their contamination challenges.
